

A CQC INSPECTION WAS CARRIED OUT IN NOVEMBER 2016. THE SURGERY HAS BEEN GIVEN AN OVERALL RATING OF REQUIRES IMPROVEMENT

Summerhill Surgery recognises that the inspection report has highlighted areas in which the practice can improve. It is also grateful that the report highlights that patients were very complimentary about the care they received from the practice, with “friendly, caring and professional” being common themes used to describe their experiences.

Since the inspection on 1st November the practice has made significant progress on the issues that have been identified by the CQC and we look forward to demonstrating the progress we have made when the CQC re-inspect the practice in the near future.
